SUMMARY

Information Science Engineering undergraduate with an 8.5 CGPA and hands-on experience in Machine Learning, Full-Stack Development, and AI-powered applications. Built and deployed real-world projects using Python, Scikit-learn, React, Node.js, APIs, and cloud platforms. IEEE Information Theory Society Vice Chair with experience organizing hackathons and technical events. Strong interest in AI/ML, software engineering, and building scalable solutions to real-world problems.

EDUCATION

Sai Vidya Institute of Technology
(Visvesvaraya Technological University)

Bachelor of Engineering (B.E) in [information science engineering]
2024 – 2028
CGPA : 8.5 (till date)

Kendriya Vidyalaya, Air Force Station, Yelahanka
Class XII (CBSE) 2023

– Science (PCMCS)
Percentage: 70%

Kendriya Vidyalaya, Air Force Station, Yelahanka
Class X (CBSE) 2021

– Percentage: 75%

ACADEMIC PROJECTS

Bharath Sync — AI/ML Air Quality Prediction
- Developed a hybrid machine learning system for AQI prediction across cities in India by combining Random Forest, Gradient Boosting, and LightGBM models.
- Integrated environmental data processing to generate 24-hour and 7-day AQI forecasts and provide interactive pollution analytics.
- Built a user-friendly dashboard for visualizing AQI trends and environmental insights, with a focus on real-world air-quality monitoring.
- Tech: Python, Scikit-learn, LightGBM, Random Forest, Gradient Boosting, Pandas, Streamlit
- GitHub: github.com/dexterrrrrrrrrrrrrrrrrrr/Bharath-Sync

AI Retinal Analyzer — Computer Vision & Generative AI
- Built an AI-powered application that analyzes retinal fundus images using computer vision techniques to identify retinal features and predict myopia.
- Implemented image-processing techniques to examine structures including the optic disc, blood vessels, and macula.
- Integrated Google Gemini to transform analysis results into structured, easy-to-understand AI-generated medical-style reports.
- Tech: Python, OpenCV, Computer Vision, Google Gemini, NumPy, Pillow, Streamlit
- Live: eye-disease-prediction-ffdexterrrrrrrrrrrr.streamlit.app

Local Mesh Alert System — Real-Time Emergency Communication
- Developed a decentralized local communication system designed to enable critical alerts and communication when traditional internet connectivity is unavailable.
- Implemented real-time communication capabilities using WebRTC and Socket.IO, enabling users within a local environment to exchange alerts and information.
- Designed the system for critical-use scenarios such as hotels, campuses, network outages, and emergency situations.
- Tech: JavaScript, React.js, Node.js, WebRTC, Socket.IO
- Live:https://local-mesh-alert-system-tujp.vercel.app/

HACKATHON EXPERIENCE

Hackathon Finalist (6+ Events)
- Participated in multiple national-level hackathons focused on education, sustainability, and social impact
- Built real-world solutions using Machine Learning, Full-Stack Development, and APIs
- Collaborated in cross-functional teams to design, develop, and present projects under time constraints
- Gained hands-on experience in problem-solving, rapid prototyping, and pitching ideas
- Developed projects like AI-based AQI Monitoring and Personal Finance Predictor
- Demonstrated strong skills in teamwork, innovation, and technical execution

SKILLS

- Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS
- Backend: Node.js, Express.js
- Database: MongoDB, Mongoose, SQL
- Programming: Python, C, JavaScript
- Machine Learning & Data: Scikit-learn, Pandas, NumPy
- Concepts: Machine Learning, RESTful APIs, JWT Authentication, JSON, Responsive Web Design, Automation Basics
- Tools & Platforms: Git, GitHub, npm, VS Code, Postman, Oracle Cloud
- Real-time: WebRTC, Socket.IO
- Soft Skills: Leadership, Team Management, Problem Solving

CERTIFICATIONS

- Postman API Fundamentals Student Expert
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate
- Artificial Intelligence Fundamentals – IBM
- Introduction to Large Language Models – IBM
- Generative AI Mastermind – Outskill
